

Index numbers of industrial and construction-assembly production in December 2011^{a)}

Index numbers of industrial and construction-assembly production in enterprises in which the number of employees exceeds 9 persons in real time (constant prices) were:

Specification	XII		I-XII ^{b)}	XII
	previous month = 100	corresponding period of previous year = 100		monthly average of 2005 = 100
INDUSTRIAL UNITS				
Total	95,1	107,7	107,7	147,2
incl.:				
minig and quarrying	96,8	107,6	102,7	86,3
manufacturing	93,4	108,6	108,3	154,2
electricity, gas, steam and air conditioning supply	113,2	100,4	102,0	121,7
water supply; sewerage waste management and remediation activities	109,5	102,7	106,7	145,1
CONSTRUCTION UNITS				
Total	140,6	114,6	116,3	303,1

^{a)} Reported data; comprise enterprises employing over 9 persons.

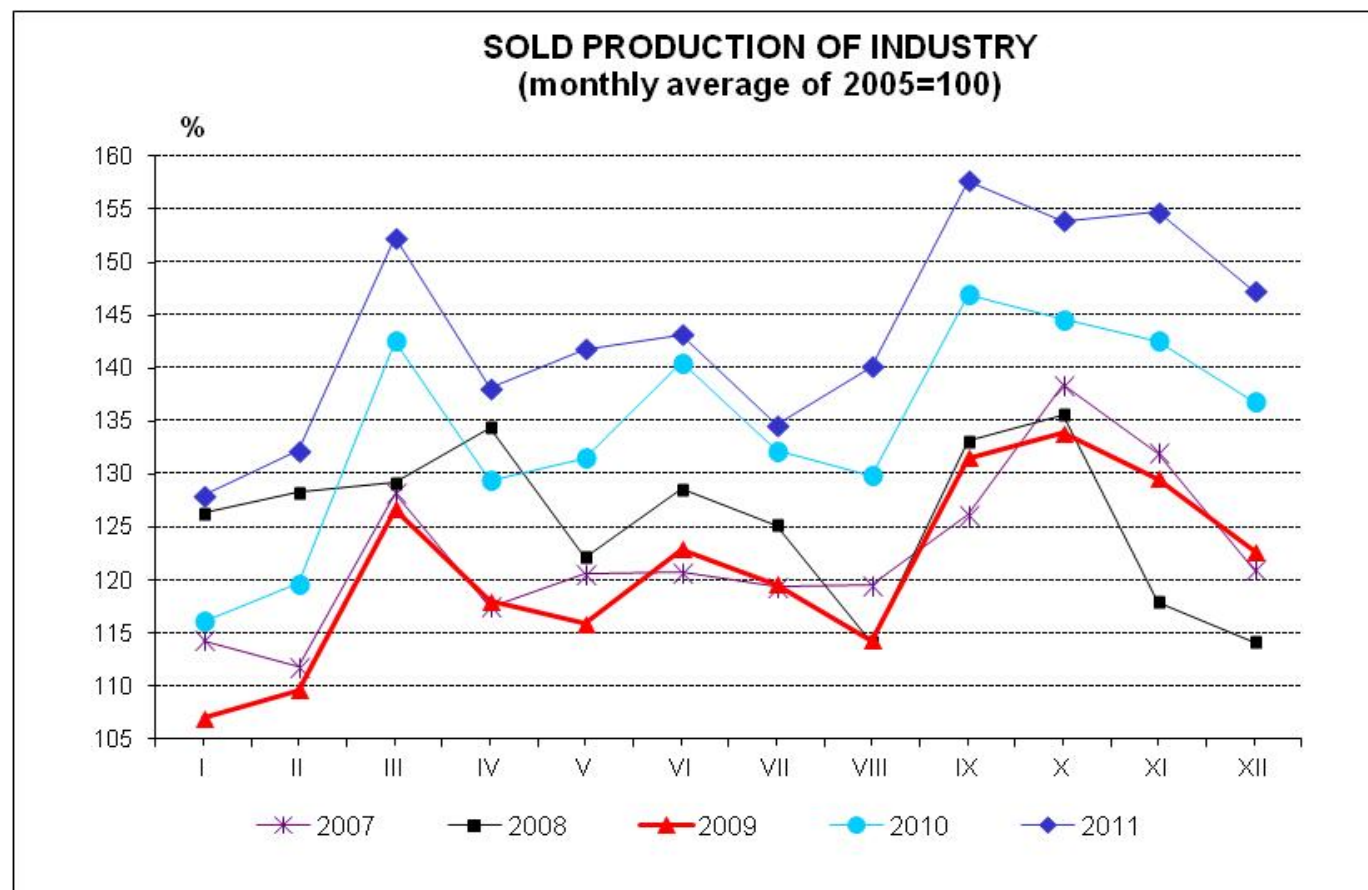

^{b)} Data including final information on production and prices in November and reported data – in December.

According to the preliminary data **sold production of industry** in constant prices (in enterprises employing more than 9 persons) in December 2011 was by 7.7% higher than in the corresponding month of the previous year, but lower by 4.9% than in November 2011. After eliminating the seasonal factors, sold production of industry reached the level higher by 9.5% than in the corresponding month of 2010 and by 0.9% than in November 2011.

As compared to December 2010, an increase in sold production was reported in 26 (out of 34) industry divisions, among others, in manufacture of coke and refined petroleum products – by 26.3%, manufacture of other non-metallic mineral products – by 24.7%, manufacture of furniture – by 22.9%, manufacture of metal products – by 15.5%, manufacture of chemicals and chemical products – by 13.0% and manufacture of paper and paper products – by 11.7%. A drop in sold production of industry, as compared to December 2010, was recorded in 8 divisions, among others, in manufacture of pharmaceutical products – by 14.4%, manufacture of machinery and equipment – by 4.3% and manufacture of wearing apparel – by 2.6%

In the period January-December 2011 sold production of industry was by 7.7% higher than in the corresponding period of 2010.

Indices of sold production of industry in comparison with an average monthly level in 2005 are presented in the graph below:

According to preliminary data, **construction and assembly production** (in constant prices), including investment and repair work, carried out domestically by construction enterprises employing more than 9 persons, was in December 2011 by 14.6 % higher than a year before, and by 40.6% higher than in November 2011. After eliminating the seasonal factors, construction and assembly production reached the level by 20.5% higher than in the corresponding month of 2010, and by 2.9% higher than in November 2011.

As compared to December 2010, an increase in production was recorded in entities dealing mainly with specialised construction activities – by 34.7%, and in entities specialising in civil engineering – by 21.0%, whereas in entities specialising in the construction of buildings it remained at the level recorded in December 2010.

In comparison to November 2011, an increase in production was recorded in all divisions of construction, including in entities whose basic type of activity is the construction of buildings – by 50.4%, in entities dealing mainly with specialised construction activities – by 45.7%, and in entities specialising in civil engineering – by 29.9%.

In the period January-December 2011, construction and assembly production was by 16.3% higher than in the corresponding period of 2010.

Indices of the construction and assembly production, in comparison with an average monthly level in 2005, are presented in the graph below:
