

Index numbers of industrial and construction-assembly production in July 2014^{a)}

Index numbers of industrial and construction-assembly production in real time (constant prices) were:

Specification	VII		I-VII ^{b)}	VII
	previous month = 100	corresponding period of previous year = 100		monthly average of 2010 = 100
INDUSTRIAL UNITS				
Total	102.0	102.3	104.2	114.7
mining and quarrying	102.6	91.9	93.2	95.5
manufacturing	102.3	103.3	105.8	119.5
electricity, gas, steam and air conditioning supply	99.4	96.3	95.7	82.6
water supply; sewerage waste management and remediation activities	100.8	106.6	103.1	117.2
CONSTRUCTION UNITS				
Total	100.9	101.1	107.3	109.6

^{a)} Reported data; comprise enterprises employing over 9 persons.

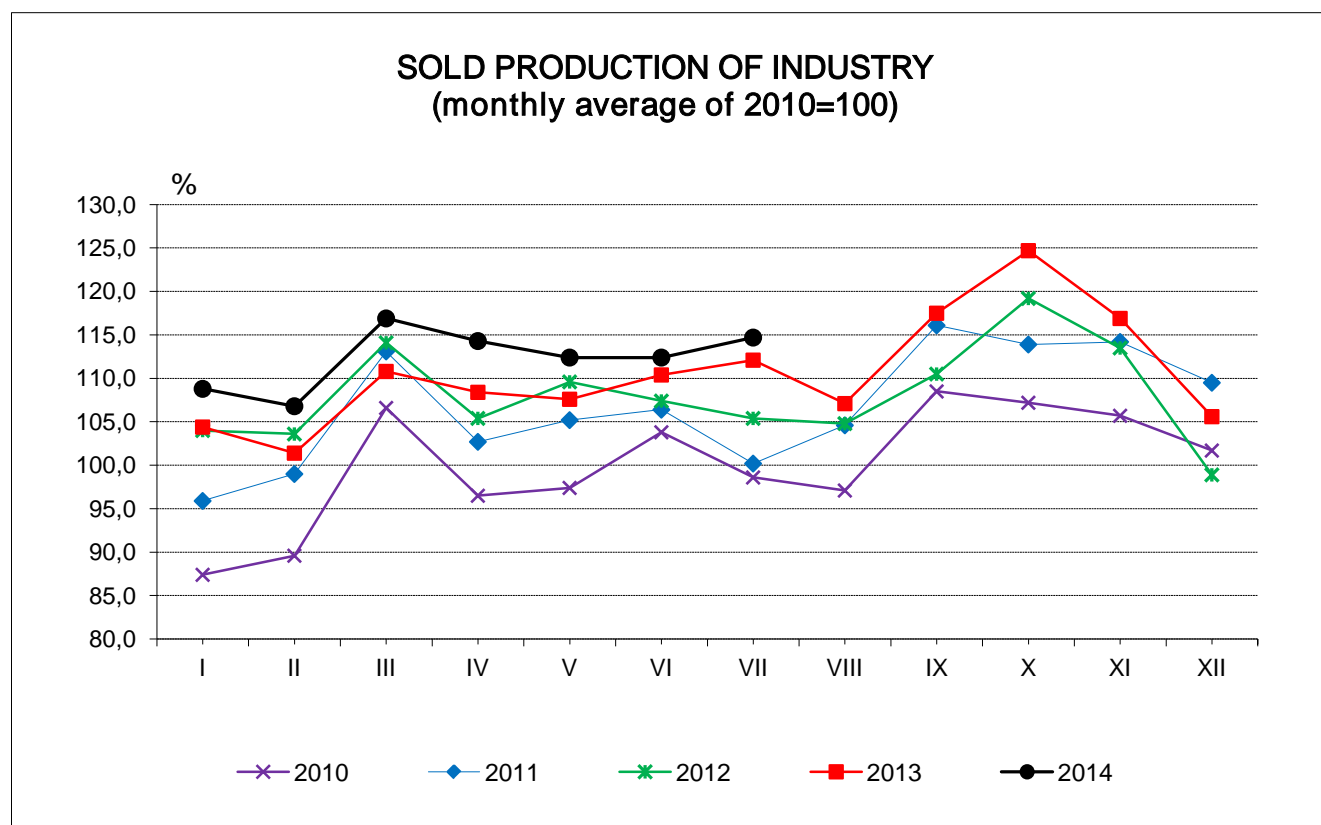

^{b)} Data including final information on production and prices in June and reported data – in July.

According to the preliminary data, **sold production of industry** in constant prices (in enterprises employing more than 9 persons), in July of 2014, was by 2.3% higher than in the previous year (when an increase by 6.3% was recorded) and by 2.0% higher than in June of 2014. After eliminating the seasonal factors, sold production of industry reached the level higher by 2.2% than in the corresponding month of the previous year and by 1.1% than in June of 2014.

As compared to July of 2013, an increase in sold production was reported in 24 (out of 34) industry divisions, among others, in manufacture of furniture – by 14.2%, manufacture of motor vehicles, trailers and semi-trailers – by 14.0%, manufacture of computer, electronic and optical products – by 11.1%, manufacture of machinery and equipment – by 6.1%, manufacture of electrical equipment and manufacture of beverages – by 4.0% in both, manufacture of metal products – by 3.4% and manufacture of rubber and plastic products – by 3.3%. A drop in sold production of industry, as compared to July of 2013, was recorded in 10 divisions, among others, in manufacture of other transport equipment – by 13.3%, in mining of coal and lignite – by 13.1%, manufacture of chemicals and chemical products – by 4.2%, electricity, gas, steam and air conditioning supply – by 3.7% and in manufacture of food products – by 2.3%.

In the period January-July of 2014, sold production of industry was by 4.2% higher than in the corresponding period of the previous year which saw a 0.6% increase.

Indices of sold production of industry in comparison with an average monthly level in 2010 are presented in the graph below:

According to preliminary data, **construction and assembly production** (in constant prices), including investment and repair work, carried out domestically by construction enterprises employing more than 9 persons, was in July of 2014 by 1.1% higher than a year before (against a decrease by 5.2% of July 2013) and by 0.9% higher than in June of 2014. After eliminating the seasonal factors, construction and assembly production reached the level by 1.8% higher than in July of the previous year and by 1.0% lower in comparison to June of 2014.

Compared to July 2013 an increase in production was recorded in entities specializing in civil engineering – by 2.7% and in entities dealing mainly with specialised construction activities – by 5.9%. There was a decrease in production in entities whose basic type of activity is the construction of buildings by 3.7%.

In comparison to June of this year an increase in production was noted in entities carrying out mainly work connected with the construction of buildings – by 15.9% while a decrease was noted in enterprises performing specialised construction activities – by 9.5% and in entities whose basic type of activity is civil engineering – by 3.3%.

In the period January-July of 2014, construction and assembly production was by 7.3% higher than in the corresponding period of the previous year, when a decline was observed by 17.7%.

Indices of the construction and assembly production, in comparison with an average monthly level in 2010, are presented in the graph below:
