## Index numbers of industrial and construction-assembly production in November $2014^{a)}$

Index numbers of industrial and construction-assembly production in real time (constant prices) were:

Specification	XI		$\mathbf{I}$ - $\mathbf{X}\mathbf{I}^{b)}$	XI
	previous month = 100	corresponding period of previous year = 100		monthly average of 2010 = 100
INDUSTRIAL UNITS				
Total	92.5	100.3	103.0	117.3
mining and quarrying	91.2	93.3	94.5	98.7
manufacturing	91.2	101.0	104.3	119.6
electricity, gas, steam and air conditioning supply	107.6	97.7	95.4	108.0
water supply; sewerage waste management and remediation activities	93.7	101.6	103.1	114.0
CONSTRUCTION UNITS				
Total	90.6	98.4	103.1	120.6

<sup>&</sup>lt;sup>a)</sup> Reported data; comprise enterprises employing over 9 persons.

 $<sup>^{</sup>b)}$  Data including final information on production and prices in October and reported data – in November.

According to the preliminary data, **sold production of industry** in constant prices (in enterprises employing more than 9 persons), in November of 2014, was by 0.3% higher than in the previous year (when an increase by 2.9% was recorded) and by 7.5% lower than in October of 2014. After eliminating the seasonal factors, sold production of industry reached the level higher by 0.2% than in the corresponding month of the previous year and by 0.1% higher than in October of 2014.

As compared to November of 2013, an increase in sold production was reported in 20 (out of 34) industry divisions, among others, in manufacture of computer, electronic and optical products – by 13.0%, manufacture of furniture – by 11.1%, manufacture of machinery and equipment – by 5.5%, manufacture of electrical equipment – by 5.0%, manufacture of pharmaceutical products – by 4.7% and manufacture of paper and paper products – by 3.8%. A drop in sold production of industry, as compared to November of 2013, was recorded in 13 divisions, among others, in manufacture of other transport equipment – by 15.6%, manufacture of beverages – by 12.2%, in mining of coal and lignite – by 7.9%, in manufacture of coke and refined petroleum products – by 4.3%, manufacture of food products – by 3.9%, in electricity, gas, steam and air conditioning supply – by 2.3%.

In the period January-November of 2014, sold production of industry was by 3.0% higher than in the corresponding period of the previous year which saw a 1.8% increase.

Indices of sold production of industry in comparison with an average monthly level in 2010 are presented in the graph below:

According to preliminary data, **construction and assembly production** (in constant prices), including investment and repair work, carried out domestically by construction enterprises employing more than 9 persons, was in November of 2014 by 1.6% lower than a year before (when a decrease was noted by 2.9%) and by 9.4% in comparison to October of 2014. After eliminating the seasonal factors, construction and assembly production reached the level by 1.1% lower than in November of the previous year and by 2.5% higher in comparison to October of 2014.

Compared to November of the previous year a decrease of production was recorded in entities dealing mainly with construction of buildings – by 12.9% and in entities involved in specialised construction activities by 1.7%. In entities whose basic type of activity is civil engineering there was an increase of works – by 9.5%.

In comparison to October of this year a decrease in production was recorded in all divisions of construction. In entities dealing mainly with construction of buildings it was 15.7%, in entities specialised in civil engineering 6.4% and in entities dealing mainly with specialised construction activities 5.1%.

In the period January-November of 2014, construction and assembly production was by 3.1% higher than in the corresponding period of the previous year, when a decrease was noted by 13.9%.

Indices of the construction and assembly production, in comparison with an average monthly level in 2010, are presented in the graph below:
